

# UPSU VICE PRESIDENT ACTIVITIES AND DEVELOPMENT

## Charlotte Panchaud

### 2018-19 Manifesto

- 1. Funding:** Society expenses have increased due to higher student engagement, yet the amount provided to societies has stayed the same. I propose to increase the available money provided by the university to reduce this strain and support societies to expand and develop.
- 2. External Speaker Policy:** With lengthy processes within the university for approving societies' events with external speakers, it's difficult to advertise and market the events effectively. I will review this policy and lobby the university to rethink their approval processes, to create one that benefits our students.
- 3. Communications:** I will review how events are shared, exploring a platform that can be utilised by societies and volunteers for the proper advertisement of opportunities to the student body. I will also support our student media groups to become more sustainable as they aren't working in their current format.
- 4. Volunteering:** I will work to support and integrate the volunteering on campus, offering more volunteering opportunities and fundraising resources to societies in support of them achieving their ICONS.
