

UPSU VICE COMMUNITIES

Walter Bitty Inyang

2018-19 Manifesto

1. **I will connect nations together** by showing their cultures to one another and build unity and end negative barriers amongst nations.
2. **Also I will provide an avenue** where students can be advised on what sort of benefits they can get in the university, for example classes for students to improve on their essay writing, and also to make their assignment writing skills better.
3. **I will also educate students** more about the benefits and importance of getting involved in student communities and letting people know that societies are not just about having cliques, but to represent a good cause, helping to move both themselves and the school forward.
4. **I am experienced** in putting across the student's voice and listening to problems no matter how small or silly it might be viewed by others. Being an international business student it has given me the skill and ability to portray my views on a wider note and more effectively to people.
